Business Information

THESE PRICES are in effect for Fall 1941 season.

PRICES named in this Trade List apply only to orders placed by nurserymen, florists and dealers.

PACKING. All goods are packed in boxes or bales for which we charge sufficient to cover cost of material used.

CLAIMS, if any, must be made immediately upon receipt of goods, and if just, made satisfactory, but in no case are we responsible for more than the purchase price of the stock in question. We will not be responsible for failure to fill orders in full or for any damage or delay to stock after delivery to the transportation company.

TERMS: We offer the usual terms; net 30 days from date of shipment to those of known responsibility but must have satisfactory business references from others or remittance must accompany order. Those desiring stock shipped by express C. O. D. will please remit ¼ the amount of their purchase when ordering. Other terms by special arrangement.

NON-WARRANTY. We give no warranty expressed or implied, the purchaser assuming all risk and responsibility of transportation, growth, planting, life of stock or any other matter on any stock we sell. We send out good stock carefully grown and packed but cannot control conditions after it leaves our care. We exercise the greatest care to keep our stock true to name and are willing to replace on proper proof any stock that may prove otherwise, or refund the amount paid us for such stock, but it is mutually agreed that we shall not at any time be liable for any greater amount.

TELL US HOW TO SHIP. Whether by freight or express and give railroad delivery if by freight. This may help in getting the stock to you with the least delay possible.

TIME OF SHIPMENT. We ship every week in the year with the possible exception of during the winter when bad weather makes it impossible, although this is very seldom. Of course, there is a regular season for shipping the different plants but if you want them out-of-season and are willing to take the risk of good delivery we will pack with the utmost care and get them off to you at most any time you want them.

PLAN TO VISIT OUR NURSERY

We will certainly be glad to have you come and see our stock for yourself. We have many items in too small lots to list. Among them there may be some that you are especially desirous of securing. If you are not familiar with the varieties we are offering we will send you a descriptive list of most of the stock offered herein, if you will ask for it.

We are located on the Eastern Shore of Maryland, about 100 miles directly south of Wilmington, Delaware. See the road map on fourth cover page.

MADE TO ORDER ZINC LABELS

We will make from your list of varieties, Embossed Zinc Labels, one-half inch wide at five cents each in any quantity desired. These labels will permanently identify your plants as they will last indefinitely.

TOUGH WATERPROOF PAPER LABELS

We can furnish a tough paper label slotted in one end at $1.00 per thousand; $7.50 per 10,000. Prices on printing on receipt of your list of requirements.

Good Stock at Low Prices

We usually start out in this space telling you about our "Good Stock at Lower Prices" but we are telling you a different story this time. You will notice it is "Good Stock at Low Prices." Yes, a good many of the prices are higher, some the same, and some few a little lower. These higher prices are still LOWER considering the advanced costs of producing the stock. However, we believe you will still find that the stock is as good as we have ever sent out, and some customers say our stock is a little better than they can get elsewhere. We don't say this but we do believe it will run as good as you can get anywhere.

You know all about the scarcity and higher prices of labor, packing materials, and other things and there is no use of telling you more about these.

We will appreciate your orders again this season and we promise to furnish the very best stock and give you the best service that we possibly can.

If weather conditions are favorable we suggest you plant as much as you can this fall so you will have that much less to look after next spring.

We again, as is our usual custom, invite you to come and see the stock before buying, but if this is impossible just send us your order and leave it to us to please you.

Ornamental Stock

Quantities: 1 to 5 at the each rate, 5 or more at the 10 rate, 25 or more at the 100 rate, 250 or more at the 1000 rate.

CYPRESS LATH SHADE

We have had so many inquiries as to where Lath Shades for covering small lining-out stock, seedlings, etc., could be secured and the price of same that we have decided to offer it to the trade. This is made with Cypress laths 4 feet long, 1½ inches wide and spaced about the width of a lath apart, woven together with three doubled strands of galvanized wire, thus giving half shade. Made in forty feet lengths at **10 cents per running foot.**

TOUGH PAPER LABELS

We can furnish a tough paper label slotted in one end, one half inch wide and 7¼ inches long at $1.00 per thousand, $7.50 for 10,000, $27.50 for 50,000. Printed to order on one side, 1,000 for $1.75, 10,000 for $11.50, 50,000 for $43.50.

Azaleas

Azaleas have been one of our specialties for many years. This season we are pleased to offer the largest stock we have ever grown, and at reduced prices, too. If you have not been getting your Azaleas—Lining-Out or Specimen—from us, we wish you would try ours this season. We aim to please you with Azaleas as well as with our other stock.

Varieties with an asterisk * are the hose-in-hose or double type.

Each X means one transplanting.

Our 1-yr. field beds XX trans. have been grown in the greenhouse one year and in outside beds one year thus making them really two years old. The 2-yr. in field beds XX trans. are two years from greenhouse and thus three years old.

KURUME AZALEAS

The Kurume Azaleas have been known to America only about 20 years, but in that time they have made wonderful progress as hardly a garden but what has one or more varieties of this wonderful type of Azalea. They are also well adapted to forcing—thousands of them being sold for Mother's Day, Easter and Decoration Day. They are comparatively easy to grow and they make such a wonderful display that the demand is continually increasing. Many of the varieties are hardy out of doors as far north as Long Island. They are extremely floriferous, and in season the blossoms completely cover the flowers. The colors are of almost every hue and shade as you will find below.

	Each	10	100	1000
AMOENA.* Flowers rosy purple, in dense masses. Hardy and early flowering. The foliage assumes a pleasing bronze tint in the fall and winter months.				
* 2 in. pot plants		$1.00	$7.00	
4 to 6 in. B&B	$0.35	2.75	22.50

18 to 24 in. B&B	1.25	11.00	100.00	
AMOENA COCCINEA.* A new hardy Azalea, equally as hardy as Amoena while in coloring it is a brilliant fiery red. One authority thinks it will displace Hinodegiri as it becomes better known, both as an outdoor plant as well as for forcing.				
* 1 yr. in field beds XX trans.		$1.50	$12.00	
8 to 10 in. B&B	$0.65	5.50	45.00

NEW U. S. D. A. AZALEAS

A group of new varieties of this wonderful June-blooming hardy evergreen Azalea released by the U. S. Department of Agriculture. Most of these were collected by the Department at the Agricultural College, Imperial University, Komaba, in Tokyo, Japan. They have been tried out by the U. S. Department of Agriculture staff and other interested growers and have been selected as being worthy of introduction in this country. We were one of the original growers selected to propagate these for the trade.

In ordering these Azaleas please use the number following the name, this will insure getting the variety wanted.

Rideway's color chart used as a guide to colors.

Our 1-yr. field beds XX trans. have been grown in the greenhouse one year and in outside beds one year thus making them really two years old. The 2-yr. in field beds XX trans. are two years from greenhouse and thus three years old.

New and Good

New Hardy Azalea Hybrids

Gable's Hardy Azaleas

These hybrids have been made in the effort to originate a hardier strain of the Japanese type of azalea in better form and color than have heretofore been available in hardy varieties.

As to hardiness these varieties will average hardier than Azalea Hinodegiri or Amoena and much hardier than the Kurumes. All have lived and flowered in the open field where they have withstood temperatures of twenty below zero and more in the last few winters with only negligible injury to a few. Most of them were quite uninjured.

LOUISE GABLE (No. 13G). Double, salmon-pink. Midseason. One of the best of the evergreen types. Height 3 ft. One year size only.

ELIZABETH GABLE (No. 21G). Rose-pink. Late midseason. Evergreen the year around. Best foliage of any of the evergreen types. Height 5 ft. One, two and three year sizes.

HERBERT (No. 47G). Magenta red. Good habit of growth. Height 4 ft. One, two and three year sizes.

Numbers 38G, 49G and 54G have not yet been named nor classified. If you want to get them so as to have a start when they are named we will furnish at same prices as for the above. One, two and three year sizes.

KAEMPFERI HYBRID AZALEAS

In these new Kaempferi Hybrids—the result of crossing Kaempferi and Malvatica—there has been obtained the hardiest type of evergreen Azalea, with a good range of form and color in the flowers so far achieved. Several years' tests have demonstrated that these new Hybrids are just as hardy as Kaempferi, until now the hardiest of the evergreen sorts.

ARNOLDIANA AZALEAS

In 1914 the late Jackson Dawson, then superintendent of the Arnold Arboretum at Boston, Mass., created a splendid new type of hardy Azalea by crossing Azalea Kaempferi and Azalea Amoena. Of the seedlings thus produced a considerable number of them were grown at Boston from their infancy until flowering age, when the following ones of unusual beauty and vigor of growth were selected.

Aluminum Sulphate

Azaleas, Rhododendrons, Blueberries, Cornus Florida, Heather, Kalmia and many other plants require an acid soil. Acid-forming organic matter, such as well rotted oak leaves helps to increase acidity. Aluminum sulfate is a good chemical for increasing soil acidity by using ¼ to ½ pound per square yard. Also used for turning hydrangeas blue.

10 lbs., $1.25; 50 lbs., $4.00; 100 lbs., $6.00.

Quantities: 1 to 5 at the each rate, 5 or more at the 10 rate, 25 or more at the 100 rate, 250 or more at the 1000 rate.

Daphne Cneorum

A Hardy Plant Novelty

Our Sure-to-Bloom Strain

When in bloom its fragrance sells it. Its small size and low price permits the customer to take it along. An ideal cash and carry item. Our improved strain blooms in May and again in August until frost.

Plants are solid, compact and symmetrical. The profusion of soft pink flowers attracts favorable attention and the strong sweet fragrance clinches the sale.

Requires a cool house, a little room and only eight weeks to force into full bloom. Can be shipped safely throughout the winter months by freight without damage.

Aunt Mary's Sweet Corn

THE SWEET CORN SUPREME

This is the most wonderful Sweet Corn we have ever grown and one grower describes it as "the best sweet corn in the world."

Is of the most delicious flavor and keeps a long time before becoming too hard to use. In fact, usually requires artificial heat to cure it for seed purposes.

Aunt Mary's corn by its excellent quality, sweetness, and flavor makes a stronger appeal to the corn-loving public than any other variety and that appeal continues long after you are tired of other sweet corns.

Price liberal size packets, 35c each, 3 for $1.00 postpaid.

If after growing this wonderful sweet corn you are not entirely satisfied we will refund every cent you paid us for it.

Ilex--Holly

We consider the Holly one of the very best ornamental trees or shrubs. Nothing is prettier than one of our American Hollies with great clusters of bright red berries and dark green leaves shining above the snow in winter. The nurseryman who will grow a collection of Hollies to a specimen size will have something he can sell whether times are good or whether they are bad. There is always a demand for them, and there will be as long as any other plants will sell. We believe there is money in growing them and will increase our stocks as fast as we can.

	Each	10	100	1000
ILEX AQUIFOLIUM (English Holly). This is not as hardy as the American Holly (Ilex Opaca) but can safely be planted from New Jersey southward. The foliage is a bright glistening green and the berries are larger than the American. A very beautiful Holly.

ILEX OPACA CROONENBURG. The Wonderful New Holly. In a mature plant, the leaves are 2½ to 3¼ inches long and 2 to 2½ inches wide, having about 7 to 9 spines of a very dark green, not having the usual yellowish tint found in the most familiar American Hollies. It bears berries from cuttings almost continuously, as three year old plants this year had branches weighed down with the growth. In a field of several thousand you could not see one plant without berries. 12 to 15 in. grafts $1.50 each; 2 to 3 ft. $4.50 each.

ILEX OPACA FEMINA. A berry bearing form of the American Holly. Cuttings selected from berry-bearing trees.

Make More Profit

Sell your Roses, Perennials, Shrubs, Vines and Fruit Trees Started and growing in

Cloverset Plant Pots

THEY ARE CHEAP IN PRICE. They are so cheap that they can be given away with the plant which insures the safe arrival, in first-class condition, of the plant grown in them, to its final destination.

THEY MAKE THE NURSERY BUSINESS AN ALL SUMMER BUSINESS. They permit the nurseryman to extend his selling season from early Spring through the Summer and Fall, and to plant Roses and other nursery stock grown in them even in the hottest Summer weather without the least sign of wilt of either the foliage or the blooms.

YOU CAN SELL YOUR PLANTS IN BLOOM. By growing your stock in our pots you may sell it in full foliage and in **Full Bloom,** when it will command the best price and most profit.

PACKING EXCELSIOR

Ideal for packing in tops of trees and plants to keep from bruising and heating. Per bale of about 100 lbs., $2.00.

SHINGLETOW

Probably the most satisfactory packing material for shrubs and trees. Keeps moist a long time and will not heat. Use this around the roots and Excelsior around the tops. Per bale of about 60 lbs., $1.25.

Lilacs--Syringa

We are just a little proud of our collection of Lilacs this season...It seems from the sales we have had the past two season that Lilacs are again coming into popularity. We suggest ordering early as some varieties are only in small supply as you will see by our offerings.

Descriptive booklet will be sent on request.

New Waterlily Magnolia

STELLATA WATERLILY. This is the new Magnolia. It is now to be called "Water Lily" Magnolia, on account of its resemblance to a waterlily and its sweet fragrance.

We sent out a good many of these plants last spring and those who have seen it in bloom are very enthusiastic about it. We believe if you are interested in Magnolias you should try one or more plants so as to see for yourself just how wonderful it is.

TYPE OF GROWTH: This plant grows in a pyramidal shape. More bushy and twiggy than the M. Stellata. It is a faster growing plant than the M. Stellata, but not as rapid as the Soulangeana, the branches being much more slender. It bears flowers in great profusion.

TIME OF BLOOMING: Approximately two to four weeks later than the Stellata.

DESCRIPTION OF FLOWERS: Flowers are well placed on ends of branchlets, measuring from 4½ to 6 inches across. The flowers consist of three to five layers, running from twenty to thirty-two petals, which have more character than the Stellata and stand in a more upright position.

COLOR OF FLOWERS: Blush pink, buds flesh pink, fading to white. This magnolia is slightly darker than the M. Stellata Rosea, but does not have the purplish tint of the Stellata Rosea.

Rhododendrons

Most everybody agrees that Rhododendrons are among the most showy of all flowering plants, and most everybody would also like to grow some but the price has always been a great drawback to quantity planting. We believe you will find our prices low enough so that you can resell them at a fair price and still make a good profit. This collection is among the very best of the hardy hybrid varieties; all good growing and good flowering kinds. Push them a little and see how your sales increase.

Send us a trial order for Rhododendrons. We know you will like what we send you.

Taxus--Yew

It is only in the past few years that nurserymen in the United States have begun to really appreciate and grow the Yew. In England there are Yews more than a hundred years old, but unfortunately the English Yew (Taxus Baccata) is not reliably hardy in the north and many do not realize that the Japanese and many forms of Media are perfectly hardy in and around Boston, and the Japanese even in northern New England.

They are not so particular as to character of soil excepting it should not be too wet, but they do appreciate plenty of good plant food. They are immune to many plant diseases and insects so destructive to many other evergreens.

The Yew in its many species and forms can well be used in most all places where any other evergreen will do well.

We honestly believe you will do well to plant and grown on some of these Yews.

	Each	10	100	1000
TAXUS BACCATA (English Yew). Widely planted in English churchyards. A good ornament. Hardy as far north as New York City. Upright, dark green foliage. Very good for the South and where it is hardy.				
* 4 to 6 in. trans.		$1.00	$7.50	$70.00
* 6 to 8 in. trans.		1.25	10.00	90.00

18 to 24 in. B&B	1.25	11.50	100.00	
TAXUS BACCATA COMPACTA. A dwarf tree-like shrub with upright branches and dark green foliage. Grows 4 to 5 feet tall. Foliage shorter and more compact.				
* 6 to 8 in. trans.		$1.25	$10.00	
* 8 to 10 in. trans.		1.50	12.50	
*10 to 12 in. trans.		1.75	15.00	
12 to 15 in. B&B	$0.65	5.50	50.00	
TAXUS BACCATA DOVASTONI. Branches are wide-spreading, nodding at the tips; leaves dull green when mature but light green when young.				
* 6 to 8 in. trans.		$1.50	$12.50	

Quantities: 1 to 5 at the each rate, 5 or more at the 10 rate, 25 or more at the 100 rate, 250 or more at the 1000 rate.

	Each	10	100	1000
TAXUS BACCATA ELEGANTISSIMA. A vigorous form of dense and compact habit, occassionally more open, with the young leaves striped pale yellow, the older ones with whitish margin.				
* 4 to 6 in. trans.		$1.00	$7.50	
* 6 to 8 in. trans.		1.25	10.00	
* 8 to 10 in. trans.		1.50	12.50	
TAXUS BACCATA HIBERNICA. A strictly fastigiate form, with stout crowded upright branches and branchlets; leaves radially arranged around the branches, dark glossy green, more obtuse than in the type. One of the most desirable evergreens of columnar habit for formal gardens. Do not recommend planting north of Philadelphia, although it is hardy on Long Island.				
* 4 to 6 in trans.		$1.25	$10.00	
12 to 15 in. B&B $1.25		11.25

18 to 21 in. B&B 2.25		20.00		
TAXUS BACCATA REPANDENS (Spreading English Yew). A low form with long wide-spreading branches and dull bluish-green, narrower and longer leaves, partly falcately curved upward. Hardy in New England.				
* 4 to 6 in. trans.		$1.00	$7.50	$70.00
* 6 to 8 in. trans.		1.25	10.00	90.00
TAXUS BACCATA WASHINGTONI (Washington Yew). A form of wide-spreading habit with leaves golden-yellow, particularly on the under side.				
* 6 to 8 in. trans.		$1.25	$10.00	
* 8 to 10 in. trans.		1.50	12.50	
15 to 18 in. B&B $1.00		8.50		
TAXUS CANADENSIS (Canadian Yew). Low shrub usually diffuse and straggling but occasionally ascending and up to 6 feet tall. The hardiest of the Yews, but less handsome than the other species, one of the chief drawbacks being the reddish tinge the foliage assumes in winter.				
* 6 to 8 in. trans.		$1.50	$12.50	
TAXUS CANDENSIS STRICTA (Dwarf Hedge Yew). The most satisfactory evergreen for dwarf edging hedges in severe New England climate. The best substitute for Dwarf Boxwood. Hardy, really dwarf, fine texture, dark, easily grown, shears perfectly, thoroughly tested for past fifteen years. Also excellent for use in general plantings of dwarf evergreens.				
* 3 to 4 in trans.		$1.00	$7.50	$70.00
9 to 12 in. B&B $1.00		9.00	85.00	
TAXUS CUSPIDATA (Japanese Yew). For any and every purpose in which evergreens are required the Japanese Yew can be recommended. Perfectly hardy in New England and Ontario, immune from most diseases and pests. Accommodating to an extraordinary degree, withstanding shade or full sunshine, dark green at all seasons of the year. Small wonder this plant has been acclaimed "Japan's greatest gift to the gardens of America." Under this heading we are offering the **spreading** or **wide growing** type which grows as broad or broader than tall.

COME SEE US. We are located on the Eastern Shore of Maryland, about 100 miles directly south of Wilmington, Delaware.

	Each	10	100	1000
TAXUS CUSPIDATA NANA (Dwarf Japanese Yew). A shrubby form with spreading branches closely clothed with short branchlets; leaves somewhat shorter and duller than the type; slow growing, rather compact. Often offered as Taxus Brevifolia.				
9 to 12 in. B&B	$0.75	$6.50		
12 to 15 in. B&B	1.00	8.50		
TAXUS CUSPIDATA NANA ERECTA. Same type foliage as above but grows more erect.				
* 8 to 10 in trans.		$2.25	$20.00	
TAXUS CUSPIDATA NANA FEMINA. A heavy berry-bearing type of the dwarf Yew with good foliage and good growing habit. Your customers will want this when they see it in fruit.				
* 4 to 6 in. trans.		$1.50	$12.50	
* 6 to 8 in. trans.		1.75	15.00	
* 8 to 10 in. trans.		2.00	17.50	
TAXUS CUSPIDATA NANA GRANDIFLORA. Practically identical with Taxus Cuspidata Nana, but grows much larger and two or three times faster. Particularly fine.				
* 4 to 6 in. trans.		$1.50	$12.50	
TAXUS CUSPIDATA OVATA. Broad, upright in habit, large dark leaf and is unusually attractive throughout the year, especially in fall. Very heavy producer of red fruit.				
* 6 to 8 in. trans.		$2.00	$17.50	
TAXUS MEDIA (Intermedia). This Yew is a hybrid of Baccata and Cuspidata, having a more vigorous habit than the English Yew and is more irregular in outline and has darker green foliage than the Japanese Yew. Could be described as a quick growing Taxus Cuspidata Nana with a similar spreading, irregular habit.				
* 4 to 6 in. trans.		$1.00	$7.50	$70.00
* 6 to 8 in. trans.		1.25	10.00

* 4 to 6 in trans.		$1.00	$7.50	$70.00
12 to 15 in. B&B	$1.25	11.00		
TAXUS MEDIA HATFIELD. Another Media hybrid. A compact bush of conical shape with upright branches and radially spreading leaves. This form may take the place of the Irish Yew where the latter is not hardy.				
* 4 to 6 in. trans.		$1.25	$10.00	
* 6 to 8 in. trans.		1.50	12.50	
15 to 18 in. B&B	$1.50	13.50		
18 to 24 in. B&B	2.00	17.50		
TAXUS MEDIA HICKSI (Hick's Yew). A distinctly columnar form with upright branches and radially spread leaves. Another good substitute for the Irish Yew where that variety is not hardy. The demand is strong for this variety—seeing is wanting. Hardy at Boston.				
* 6 to 8 in. trans.		$1.25	$10.00	
* 8 to 10 in. trans.		1.50	12.50

30 to 36 in. B&B	2.00	18.50	175.00	
TAXUS MEDIA HUNNEWELLIANA. A natural cross between the Japanese and Canadian Yews. An intermediate between the parents in habit of growth, in color of foliage and in general appearance. It is perfectly hardy and of elegant form but in the winter the clear green of its foliage is masked by a yellowish-bronze pigment.				
* 4 to 6 in. trans.		$1.25	$10.00	
* 8 to 10 in. trans.		1.75	15.00	

AMES NO. 3 SPADES

This is the spade we use here. Polished blade of solid steel, 12½ in. long, tapered down to 5½. Weight 7½ lbs. Metal reinforced handles all way up. $4.50 each.

	Each	10	100	1000

TAXUS MEDIA KELSEYI. The first of the new Yews to be propagated from the point of view of its showy red fruit. Fairly slow grower. Dark green, dense needles of the brevifolia type. Upright bush. Begins bearing berries even on small plants. Larger sizes literally infested with the bright red fruits. A real worth-while new plant.

* 4 to 6 in. trans. $1.50 $12.50

TAXUS MEDIA NEWPORT. This is the narrowest growing Yew we have ever seen. Foliage a good dark green, good grawer. This plant is adaptable to places where most other plants would be too wide. Not more than 2 large ones to a customer.

* 4 to 6 in. trans. $2.50
18 to 24 in. B&B $3.50

TAXUS MEDIA TAUNTON. A low growing heavy, dark green foliage Yew. This is an unusual type in that the branches start out horizontally and then make an upright growth. We found this growing in a nursery in Massachusetts and consider it distinct from all other Yews we are growing.

* 4 to 6 in. trans. $2.50

TAXUS THAYERI. A variety of regular Cuspidata or spreading type. Good grower and very desirable.

* 4 to 6 in. trans. $1.25 $10.00

TAXUS MEDIA VERMEULEN. Very compact and dense upright grower. Broad base and narrow top. Beautiful pyramid heavily interspersed with red berries.

* 4 to 6 in. trans. $1.25 $10.00
* 6 to 8 in. trans. 1.50 12.50
12 to 15 in. B&B $1.25 11.00

TAXUS MEDIA WARDI. A selection of the Intermedia types growing in a low spreading very compact plant. Similar to the regular Intermedia variety but foliage a little finer.

* 4 to 6 in. trans. $1.25 $10.00

TAXUS MEDIA WELLESLEYANA. Another form of Media making a dense, broad column; foliage a fine dark lustrous color. Should prove valuable.

* 4 to 6 in. trans. $1.25 $10.00
12 to 15 in. B&B $1.25 11.00

MORE HATFIELD YEWS

The following varieties were grown from stock purchased from the late T. D. Hatfield. He selected these as being the best of his unnamed varieties and we are still carrying them under his original numbers. No. 18 is one of the most rapid growers of the lot and we believe it will make one of the best for hedges. All of them are good.

AZALEAS AND CAMELLIAS By H. H. Hume

Interest in Azaleas and Rhododendrons is greatly increasing. Until now, little information on varieties, care and culture of these plants has been available. Mr. Hume accurately and thoroughly describes the varieties best suited for various uses and discusses questions on culture, such as soils, fertilization, planting, propagating, and general care, indoors and out. He has taken special care to describe accurately the several groups and varieties, and his suggestions on the use and culture are very practical. If you are growing Azaleas and Rhododendrons you will find this book much help. While the book is titled Azaleas and Camellias it applies equally to Rhododendrons. **$1.50.**

The three following varieties belong to the Yew family				
CEPHALOTAXUS DRUPACEA (Japanese Plum-Yew). Srhub or small bushy tree rarely to 30 feet tall with wide spreading branches, usually light green; leaves about 1 inch long abruptly pointed, narrow and straight, often upturned; purple fruit about 1 inch long. Hardy in sheltered places as far north as Massachusetts.				
* 4 to 6 in. trans.		$1.00	$7.50	
* 6 to 8 in. trans.		1.50	12.50	
* 8 to 10 in. trans.		1.75	15.00	
CEPHALOTAXUS PEDUNCULATA FASTIGIATA (Harrington Plum-Yew). This plant grows almost exactly like a fine type of the Irish Yew, forming a tall, narrow, compact, dark green column with thick, narrow leaves 2 inches long. Hardy as farm north as New York. Very nice.

TROWBRIDGE GRAFTING WAX

Probably the best known Grafting Wax on the market. It formulated about 86 years ago and consists of high grade Gum Resin, Beeswax and Tallow. Extreme care is exercised in blending these ingredients in order that Trowbridge Grafting Wax may be possessed of the most even consistency and elasticity of any.

Trowbridge Grafting Wax is preferred by most nurserymen and orchardists since it may be used either by the warmth of the hands or melting in a suitable melting pot. When used by the hands, one should grease their hands well when using it. When used by melting, the wax is applied with a small brush.

It is used for grafting, budding, top working, etc., of all kinds of fruit, ornamental trees, shrubs and vines. It is unexcelled for use in painting cuts, bruises and after trimming.

Price 50c per pound, 10 lbs. or more at 40c per pound.

Root Cuttings
Better and Quicker
WITH
THE PLANT HORMONE POWDER

ROOTONE
PATENTS PENDING

Just Dust and Plant—No Solutions
No Waiting—No Watching

We recommend ROOTONE because we have found it of much help to us in rooting cuttings both in saving of time and in increased roots to the cutting. We use it on all the cuttings we put in. We know it pays us both in better roots and time saved in cutting beds.

ROOTONE Is Best For Cuttings Because—

LOW COST—Can treat 30 to 50 cuttings for one cent.

SIMPLICITY—No skill is needed to apply ROOTONE. No measurements, no vials, no elaborate charts to follow, or clock-watching are needed. Just dip in dry powder and plant.

SPEED OF ROOTING—The time of rooting of cuttings is cut by ROOTONE treatment to anywhere from one-half to one-tenth of the time required without treatment.

SURENESS OF ROOTING—Cuttings that root with difficulty, such as holly, magnolia, arborvitae, lilac and dogwood will respond in greatly increased percentages and in much shorter time.

ROOTONE is a general stimulant for plants, supplying extra hormone at times when the plant is able to use more than Nature provides.

ROOTONE treatment hastens and improves the rooting of cuttings; increases germination from seeds and bulbs, resulting in earlier flowering.

2 oz. Jar $1.00—1 lb. Can $5.00, Postpaid.

A two ounce jar will treat up to 3,000 cuttings; one pound will treat up to 30,000 cuttings.

No solution or soaking treatment is necessary. Just dip the base of the cutting in the dry powder and set in the propagating bed or cold frame.

TRANSPLANTONE

The Vitamin Hormone Stimulant For Plants

When seedlings, plants, shrubs or trees are transplanted, roots are usually damaged to some extent and growth is temporarily checked. The beneficial effect of Vitamin B-1 and other parts of the Viatmin B complex on roots has been established in research work by leading plant physiologists.

These chemicals and root forming hormones are combined in TRANSPLANTONE to enable transplants to reestablish themselves more readily.

Thus a treatment of TRANSPLANTONE will stimulate old roots, hasten the formation of new ones and reduce the risk of interrupted growth or loss of plants.

3 oz. Can $1.00—1 lb. Can $4.00, Postpaid.

WHAT ABOUT VITAMIN B1

Vitamin B-1 is necessary for root growth. Plants that lack this vitamin grow better when TRANSPLANTONE is fed to them. For plants that have enough B-1, TRANSPLANTONE is effective because it contains other important stimulating vitamins and chemicals. TRANSPLANTONE is a balanced vitamin hormone stimulant for plants in general.

Hardy Perennials

Below you will find a few of the very best varieties of Perennials. These are the ones you will find in general demand, easy to handle, and ones that will show you a good profit. All good stock.

Hardy Amaryllis—Magic Lily

We have, at last, a good stock of bulbs of this most interesting plant. Great big husky fellows. At 10 *for* $4.00; 100 *for* $35.00.

This bulb, also known as Lycoris Squamigera, is a native of Japan and one of the most interesting members of the Amaryllis family. It produces attractive green foliage in the spring which disappears in midsummer. About a month later, as if by magic, the flower stock appears, bearing a cluster of 7 to 12 fragrant lily-shaped flowers of delicate lilac-pink, shaded blue. Perfectly hardy in the northern states and may be left in the ground year after year unmolested.

Blueberries

These blueberry plants are a source of superlatively fine fruit, but also are ornamental shrubs of rare beauty. They may well be used in association with their close relatives, laurel and rhododendron. In pleasant contrast to the rich, evergreen masses of the latter, blueberries give lightness, grace and color.

In spring, the dainty new leaves of blueberries with their pinky, bronze tone are very lovely. Even more charming are the carmine-tipped buds and myriads of waxy, white flower bells. The berries, at first green flushed with pink on the sunny side, then ripening to a lovely soft blue, are exceedingly beautiful till past midsummer. To no foliage does autumn bring a more glorious and lasting crimson. When the gorgeous leaves drop there remain all winter bright red twigs, knobby with the fat buds enfolding the promise of next spring's flowers.

There has developed an enormous demand for these plants, both for fruit and ornamental purposes. If you have not been getting some of this trade you are missing some good profits. They are easy to grow and handle. Put in a small stock and let us supply you; will send to you or direct to your customers under your tag.

Description of Varieties

RUBEL. A vigorous, productive variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July.

CABOT. The earliest variety. Plants seldom exceed three feet in height and make a broad low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious sub-acid flavor.

RANCOCAS. The bush of slender, vigorous, upright habit rarely surpasses five feet in height. The winter twigs are a dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

CONCORD. The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are fine in flavor and appearance.

JERSEY. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are the largest of any here listed, light blue and ripen about the same time as Rubel.

Native Peat or Wood's Mold

To grow Azaleas and Rhododendrons successfully you must have leaf mold, peat in some form or some similar substance. We have used Russian, German and Holland Peat, leaf mold collected from under trees in our local forests, but by far the best material we have ever used is a form of native peat, a deposit of which we have found near here. It runs from twelve to twenty four inches thick and is composed of thoroughly decayed leaves and other material from hardwood trees which has been generations in the making. We fully recommend this for use in growing stock and to use in a mixture of soil and sand in which to sow seeds but we do not recommend it for use in propagating evergreens and other soft wooded shrubs by cuttings.

If you would like to try it we will send you a two-bushel bag for $1.00. Will quote special prices on larger lots. Try a sample bag, we believe you will like it so well you will want more.
